

I am paying each month for satellite radio. I love everything about satellite radio, including traffic and weather for the major cities in America. When I travel to other cities, I feel that I have instant access to the traffic tie-ups to the upcoming cities. That way I can alter my travel route before I get to the traffic jam. Cities should appreciate this vs. trying to block access to this station.

Not everyone has satellite radio, and I feel that free radio will never be heavily threatened. There is room for everyone.

Please leave satellite radio as it is, and please give us access to the paid right to have the channels given to us--that is why we pay for the access.
